For all applications:

- For use on greens, tees, fairways and roughs.
- Apply to dry foliage.
- Water in after application with a minimum of 0.2 inches to help move particles into the turf canopy.
- Do not collect clippings for at least one mowing following application to avoid particle pick-up.

Cool Season Grasses:

- Apply at LOW or MEDIUM RATE.
- Apply at HIGH RATE in spring or fall when deeper greening is desired or to correct or prevent iron deficiencies.
- Exception: Apply at LOW RATE in mid-summer when temperatures are above 80°F.

Warm Season Grasses:

- Apply at the LOW or MEDIUM RATE.
- HIGH RATE may be used to help bring grass out of dormancy in early spring (such as bermudagrass) or to correct or prevent iron deficiencies.
- Exception: Apply at LOW RATE during mid-summer when temperatures are extreme (90°F or above).

Note: This product contains the micronutrient iron for extra greening and to help prevent iron deficiency. Iron may stain concrete and other surfaces. Misapplied product to these surfaces should be removed promptly by sweeping or blowing. Do not wash off with water.

Recent research has shown that environmental buffers prevent pollutants from entering our natural water bodies. To help protect these natural resources, avoid applying product to sidewalks, driveways, roadways, and other impervious surfaces. Sweep any misplaced granules back onto the area you are treating immediately after application, since storm drains often empty directly to nearby waterways.
