

PPZ 41.8 SELECT[™]

Effective long-term residual fungicide protection

ACTIVE INGREDIENT

Propiconazole – Group 3

% ACTIVE INGREDIENT

Propiconazole 41.8%

FORMULATION

Emulsifiable concentrate

CHEMICAL FAMILY

Triazole

BRAND ALTERNATIVE

Spectator[™]

MODE OF ACTION

Demethylation inhibitor,
Inhibits sterol biosynthesis
in the fungal cell

RESTRICTED USE

No

SIGNAL WORD

Warning

PACKAGING

4 x 1 gal

LABELED USES

Golf courses
Commercial lawns
Residential lawns
Landscapes
Nursery

PPZ 41.8 Select[™] is a broad spectrum fungicide recommended for the control of many important plant diseases with both preventative and curative action in turfgrass and ornamental use. By providing full season protection, **PPZ 41.8 Select[™]** is an economical way to protect and enhance the return on your investment. With a low odor emulsifiable concentrate formulation, **PPZ 41.8 Select[™]** is effective in improving the rate of establishment, when applied to cool season grass seedlings or sod.

PRODUCT BENEFITS

- Excellent residual control
- Low use rates
- Low odor formulation
- High tank mix compatibility
- Labeled for turf and ornamental applications

**IMPORTANT: ALWAYS
READ AND FOLLOW
LABEL INSTRUCTIONS.**

PPZ 41.8 SELECT™

Effective long-term residual fungicide protection

Turfgrass disease control

PPZ 41.8 Select™ is a systemic fungicide for use on turfgrasses for the control of over 19 listed diseases. **PPZ 41.8 Select™** also controls numerous diseases on ornamentals and other landscape and nursery plantings. It controls powdery mildews, rusts, leaf spots, scabs, and blights. Refer to the appropriate sections of the label for application instructions for specific diseases and plants.

For broader spectrum control, **PPZ 41.8 Select™** can be mixed with other fungicides and is also compatible with numerous herbicides and insecticides. Observe all directions, precautions, and limitations on labeling of all products used in tank mixes.

Establishment of cool season turfgrass

PPZ 41.8 Select™ provides control of many diseases of turf, and its primary use is as a fungicide for use against the diseases listed on this label. As an additional benefit, **PPZ 41.8 Select™** will improve the rate of establishment when it is applied to cool season grass seedlings or sod.

New seedlings

Apply 0.35 fl. oz./1,000 sq. ft. at the 2 to 3-leaf stage of growth for faster root development and top growth.

Sod

Apply 0.35 fl. oz./1,000 sq. ft. 2-6 weeks before cutting for increased sod knitting and faster establishment after laying.

Labeled turf diseases

Dollar spot	Spring dead spot
Brown patch	Take-all patch
Anthracnose	Leaf spot
Red thread	Gray leaf spot
Pink patch	Pink snowmold
Rust	Fusarium patch
Powdery mildew	Gray snow mold
Stripe smut	Yellow patch
Summer patch	Zoysia patch
Necrotic ring spot	

Labeled ornamental diseases

Powdery mildews
Rusts
Leaf spots
Scabs
Blights

Read label for full application and rate information.
