

# Turf Trade Exchange

Vol 2 July 2020

## Just the Facts

**EXPERT** Bentgrass Blend – The only Oregon blended, authorized pairing of Mtn. View Seeds' Piranha + Barracuda + Tee-2-Green's Crystal BlueLinks (CBL) Creeping Bent varieties. EXPERT can be used in low-cut greens to higher-cut fairways/tees without puffiness or scalping. **It pairs proven CBL technology with exciting ultra-dense cultivars from Rutgers University, resisting disease & recovering better in heat/drought to create the most unique bentgrass blend on the East Coast.**

- Piranha/Barracuda parents come from 100+ year old NJ/NY golf courses and were bred by Dr. Stacy Bonos of Rutgers University.
- Crystal Blue Links has NTEP-proven ability to establish rapidly and handle tough environmental growing situations.
- Piranha is #1 in 2019 NTEP NJ Trial locations for both greens & fairways/tees. No other commercially available variety can say that.

**LateralSpread™ Tall Fescue & Perennial Ryegrass** breeding spotlights aggressive LS varieties. Plants are selected & bred together 1000s of times in Oregon, and then Mtn. View selects the best, stronger plants that tiller the quickest, but also resist disease and recover from heat and drought better. LS is the mark of proven, better cultivars for turf quality and are available from Turf Trade.

Difference in lateral spread between individual plants in a mowed space plant nursery

**Now's the time to talk with your Turf Trade Rep about your Fall seed needs.**

## Turf Pulse

*"Greens are uniform, staying perfect moisture, keeping speeds. I like that you don't have to pound the water to get Game Changer into the rootzone and it still works."*  
Golf Course Superintendent, New York

*"Since using Bio-Mas we have reduced the amount of fertilizer we apply and have used less control products."* Sod Farm Turf Manager, New Jersey

*"Using Bio-Fusion + myco and Reliant Phosphite, I have reduced the amount of disease problems on my lawns and have seen control of dollar spot."*  
Lawncare Manager, New Jersey

## Featured Products

### Game Changer Soil Wetting Agent

**Excellent Customer feedback during this hot, dry summer.**

- Blend of multiple surfactants
- Different chemical structure for reliable, safe performance.
- Works on USGA & native soils
- Very low water-in requirements. Doesn't get caught up in thatch/mat layer.

### Phosphites for Summer Stress

Increase production of:

- Plant hormones and auxins for faster recovery
- Antimicrobial and antioxidative substances, Phytoalexins
- Flavanoids and Isoflavanoids protect turf from biotic and abiotic stresses
- Lignin and phenols to strengthen turf's resistance to disease
- Multiple Turf Trade Phosphites available. Ask your rep which low salt index product is best for you.

## Did You Know?

Mycorrhizae are beneficial fungi that offer many benefits. Freeing up minor nutrients like calcium, magnesium, iron, copper and zinc is just one. Endo species are most often utilized by grasses. And it's available in Turf Trade Custom Blend fertilizers.

Calcium plays more roles in the overall health of both the plant and the soil than any other nutrient. Recovery, turf cell strength, soil, water, and disease management.

*Because what's in the jug/bag matters. Proudly hand selecting high quality ingredients for your success.*
